

Han Wu

hanwu-jet.github.io | jethw123@gmail.com

Research Interests: Information Science / Social Computing, HCI / Human-Centered Computing, Public Policy / Technology Policy, Visual Analytics, Graph Machine Learning, Computational Social Science

EDUCATION

University of Minnesota

B.A. in Computer Science and Economics

Aug. 2024 – Dec. 2026

Minneapolis, MN, USA

RESEARCH EXPERIENCE

Research Assistant

Heller-Hurwicz Economics Institute, University of Minnesota

Apr. 2025 – Oct. 2025

Minneapolis, MN, USA

- Used Python and Stata to clean, merge, and analyze large-scale administrative healthcare datasets on access, provider competition, and Medicaid participation across U.S. states.
- Built automated workflows for regression models, summary statistics, and empirical analysis to evaluate public-policy mechanisms and research hypotheses.
- Communicated quantitative findings through poster sessions and public seminars, translating data-intensive results for interdisciplinary audiences.

Research Assistant

University of Minnesota Libraries

Mar. 2025 – Jul. 2025

Minneapolis, MN, USA

- Conducted a literature review of 50+ papers on crowdsourced psychological interventions and digital support systems, synthesizing prior work to inform the study framework.
- Designed a research questionnaire and helped refine the study's core research framework for evaluating student needs and digital experiences.
- Collected, organized, and analyzed feedback from UMN students on digital technologies and the Libraries homepage, translating user data into actionable interface recommendations.
- Co-authored a research paper based on the study; findings contributed to subsequent updates of the UMN Libraries homepage.

SELECTED PUBLICATIONS

Yuzhen Lin, Ivonne Xu, Qi Hu, Ge Zhang, Yajin Li, Yuan Gao, and **Han Wu**. **ProtoHGC: Heterogeneous Graph Contrastive Learning with Prototype-Regularized Classification for Transaction Fraud Detection**. Manuscript under review.

L. Costello, K. McManus, and **Han Wu**. **Investigating Proactive Chat: Exploring Potential Users and Accessibility**. *RUSQ: A Journal of Reference and User Experience*, vol. 61, no. 4, pp. 38–52, 2026. doi:10.5860/rusq.61.4.8786.

Hanlu Zhang, Yuan Gao, Ruijie Zhu, **Han Wu**, Shicheng Zhou, and Jiangtian Pan. **Dynamic Attention-Guided Video Generation from Text with Multi-Scale Synthesis and LoRA Optimization**. *ISCATI 2025, IEEE*, pp. 313–316, March 2025.

TECHNICAL & RESEARCH SKILLS

Programming & Data: Python, JavaScript, TypeScript, SQL, C++, Stata

Interactive Systems: React, Next.js, Node.js, Vite, Tailwind CSS

Research Methods: Regression analysis, questionnaire design, literature review, user feedback analysis, statistical summaries

Tools & Infrastructure: Git, Docker, PostgreSQL, AWS (EC2, S3, RDS)
